

# Campership Application Process

Here is how the process works:

1. Scouts must register for camp before a campership application can be completed. The online link for the campership is the last question under the attendee information.
2. Campership applications must be completed when it is started. The system does not save any information in the campership if left incomplete. The application will have to be started again.
  - If a unit is registering multiple scouts on one registration, the unit may use the parent portal option. This will allow each family the ability to log into the Unit's registration to complete the campership application. Each Scout will be given a unique password to gain access to the unit's registration. They will only have access to their Scout's information. Units can also use the parent portal to allow each family to make payments.
3. You will receive communication regarding your Scout's campership by May 15<sup>th</sup>.

If you have any questions, please contact [skcquestions@scouting.org](mailto:skcquestions@scouting.org) or 614-310-1336.
